

Publications:

1. Okadaic acid inhibits a protein phosphatase activity involved in formation of the mitotic spindle of GH4 rat pituitary cells. 1992 **J. of Cellular Physiology** 152:190-198. [Abstract Available](#)
2. Morphological and biochemical variability of *Prorocentrum lima* (Ehrenberg) Dodge isolated at three sites of Heron Island, Australia. 1995 **J. Phycology** 31:914-922.
3. Determination of okadaic acid from dinoflagellate cells: A comparison between the HPLC method and two monoclonal antibody ELISA test kits. 1996 **Toxicon** 34:947-954. [Abstract Available](#)
4. Survey of toxic epiphytic dinoflagellates from the Belizean barrier reef ecosystem. 1997 **Bull. Marine Sci.** 61(3):889-906.
5. Evidence for diarrhetic shellfish poisoning along the coast of Maine. 1997 **J. Shellfish Res** 18:679-684
6. Flow cytometric determination of cell cycles and growth rates of *Prorocentrum* spp. 1998 In: **The Physiological Ecology of Harmful Algal Blooms**. pp. 619-648.
7. Okadaic acid production from the marine dinoflagellate *Prorocentrum belizeanum* isolated from the Belizean coral reef ecosystem. 1998 **Toxicon** 36 (1):201-206. [Abstract Available](#)
8. Bloom of Gonyaulax polygramma Stein (Dinophyceae) in a coral reef mangrove lagoon, Douglas Cay, Belize. 1998 **Bull Mar. Sci.** 63: 639-642.
9. Morphology and toxicology of *Prorocentrum faustiae* sp. nov., a new toxic species of benthic dinoflagellate isolated from Heron Island, Australia. 1998 **Botanica Marina**, 41(6):565-570.
- 10 11. No evidence for an allelopathic role of okadaic acid among ciguatera associated dinoflagellates. 1999 **J. Phycology** 31:395-400.
12. "Shellfish Toxins" Chapter: 2000 **Marine and Freshwater Products Handbook**. Technomic Publishing Co., Inc., Lancaster. Pp.727-738.
13. Health and Ecological impacts of harmful algal blooms: risk assessment needs. 2001 **Human and Ecological Risk Assessment**
14. Review and Assesment of In vitro detection methods for algal toxins: conceptual approaches and recent developments. 2003 **JAOAC International** 84:1617-25
